Pitch Deck -Atlassian Forge Apps

Future SaaS Products Hosted by Atlassian

Presented by Matti Kiviharju

Atlassian Forge is a cloud-native platform for app development

Apps are hosted by Atlassian — no need for Virtual Private Servers

Reduced operational burden and lower hosting costs

Pricing model: Monthly or Annual subscriptions

Potential to build sustainable income for living expenses

## Market Opportunity

- Atlassian has 300,000+
  Atlassian customers) and 80 % of Fortune 500
- Jira, Confluence, and other Atlassian tools dominate enterprise SaaS
- Transparent pricing and installation data on Atlassian Marketplace
- Strong demand for productivity, automation, and reporting apps
- Forge enables faster, secure development with global reach

# Cloud App Pricing Overview

Up to 10 users - \$10 flat fee/month

11-100 users - \$4.53/user/month

101-250 users - \$3.18/user/month

251-1000 users - \$1.51/user/month

1001-2500 users - \$0.84/user/month

2501-5000 users - \$0.48/user/month

5001+ users - \$0.20-\$0.31/user/month depending on tier

Annual billing available, scaling revenue further

### Business Model

Subscription-based SaaS model

 Monthly recurring revenue (MRR) for steady cash flow

• Annual recurring revenue (ARR) for long-term stability

 Atlassian handles hosting, scaling, and security

 Zero infrastructure costs — focus on innovation and support

# Advantages of Forge

Built-in hosting by Atlassian

Compliance with Atlassian's enterprise-grade security

Easy integration with Jira, Confluence, Bitbucket

No infrastructure management required

Faster time to market for new ideas

### **Next Steps**

Identify high-value app ideas for Forge ecosystem

Develop prototypes and test with early adopters

Leverage Marketplace visibility for adoption

Build portfolio of multiple Forge apps for recurring revenue

Scale into enterprise-level deployments
